

SOLUTION BROCHURE

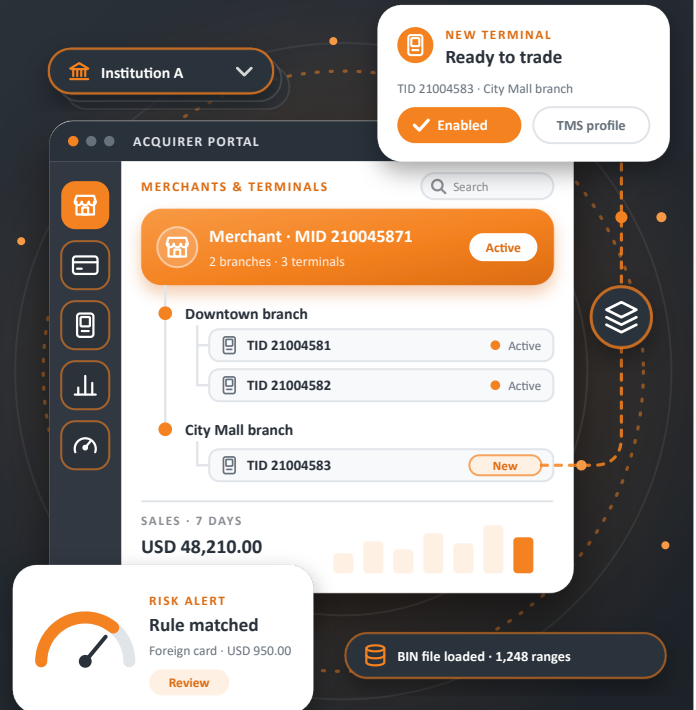

Acquirer Management

Portal with risk monitoring

Run the acquiring business from one secure, web-based back office: merchants and terminals, issuers and BINs, merchant categories, pricing, reports and risk alerts, for one institution or several.

ISO/IEC 27001 CERTIFIED

PCI S3 CERTIFIED

WHY THE ACQUIRER PORTAL

Your acquiring estate in one place

The Acquirer Management Portal is where bank, operations and support teams run the merchant estate: merchants and their terminals, merchant categories, card issuers and BIN ranges, merchant fees and transaction limits. It is a web application, so teams work from the browser with no software to install.

New merchants and terminals arrive by screen, bulk file or system-to-system integration, ready for the gateway. The same portal hosts ApexTMS and ApexRPM, reports and dashboards, and a Risk & Fraud Monitoring module that flags transactions matching your risk rules.

3 ways

Onboard by screen, bulk file or system-to-system integration.

1 portal

Several institutions, each with its own databases and settings.

Live check

Merchant, terminal and category status checked on every transaction.

KEY BENEFITS

Built for bank, operations and risk teams

Acquirers & banks

- ✓ Faster onboarding by screen, bulk file or system-to-system integration.
- ✓ Run several banks or brands from one portal, each with its own data.
- ✓ Issuers, BIN ranges and merchant categories kept in one managed place.

Operations teams

- ✓ Reports, dashboards and terminal actions in one place.
- ✓ Block or enable a merchant, a terminal or a whole merchant category.
- ✓ E-mail statements to one merchant or to every merchant in one request.

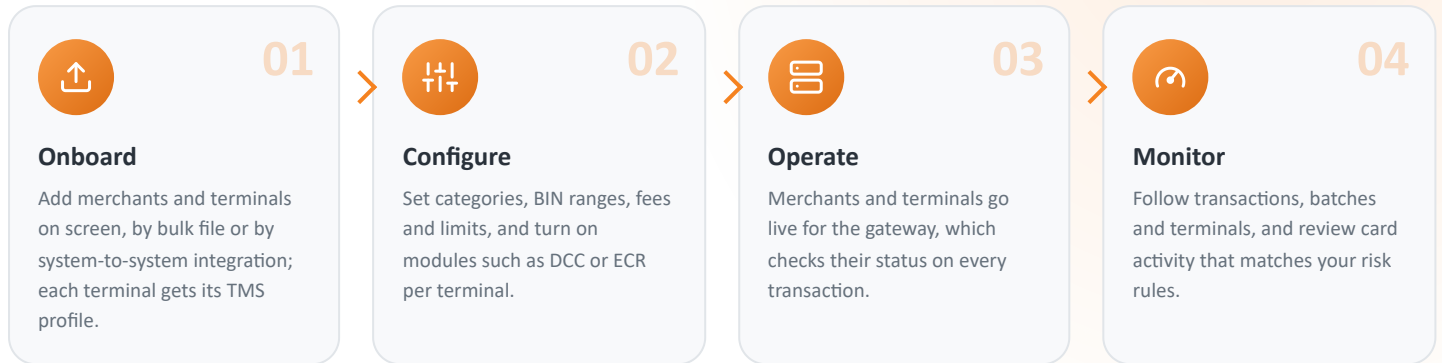

Risk & finance teams

- ✓ Risk rules flag matching card activity for review, and each match is kept.
- ✓ Count and amount limits per merchant, over a period you set.
- ✓ Pricing templates set discount rates by scheme, card type and transaction.

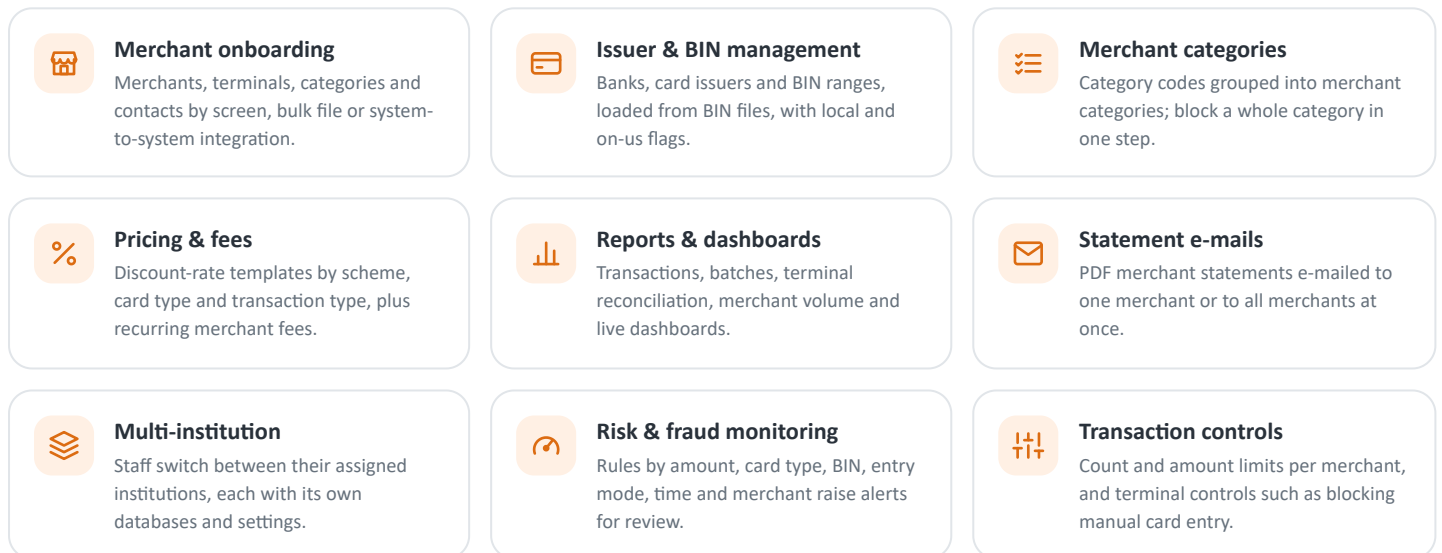

INSIDE THE PORTAL

From onboarding to daily control

PLATFORM FEATURES

Everything needed to run an acquiring back office

IDEAL FOR

 Banks

 Acquirers

 Payment service providers

 Processors

 Risk & operations

PLATFORM

Built on the Apex Payment Gateway

What you set in the portal is what the gateway checks on the next transaction.

Gateway-ready data

The gateway checks merchant, terminal and category status on every request.

Dedicated deployment

Each institution has its own databases; Apex deploys and upgrades the portal.

With ApexTMS & ApexRPM

Terminal profiles and remote terminal actions from the same portal.

Merchant Portal ready

Switch on portal access and the merchant's Merchant Portal account is created.

Let's talk payments.
