

SOLUTION BROCHURE

ApexECR

Cash register integration

Connect cash registers and hospitality systems to Apex SmartPOS: the amount flows straight from the register to the terminal and the result returns to the register, so nothing is keyed twice.

ISO/IEC 27001 CERTIFIED

PCI S3 CERTIFIED

WHY APEXECR

No amounts keyed twice

With ApexECR, the cashier rings up the sale on the register as usual. The amount goes straight to the Apex SmartPOS, the customer taps, inserts or swipes once, and the result, with the authorization details and receipt, returns to the register to close the sale.

Choose the link that suits each merchant: Cloud ECR through the Apex cloud with no cables, a ready-made integration kit that gives cash-register vendors a direct connection, or hotel and restaurant management systems. All three drive the same SmartPOS.

3 ways

Cloud ECR, a vendor integration kit, or hospitality systems.

No cables

Cloud ECR links register and terminal through the Apex cloud.

Round trip

Result and receipt return to the register to close the sale.

KEY BENEFITS

Built for acquirers, merchants and vendors

Acquirers & banks

- ✓ Win chain and hospitality merchants: offer the register integration larger merchants expect.
- ✓ Integrated merchants are less likely to switch provider.
- ✓ Simple roll-out: no cables for cloud ECR, one kit for vendors.

Merchants

- ✓ Faster checkout, with shorter queues at busy counters.
- ✓ Amounts flow from the register: fewer errors and disputes.
- ✓ Result and receipt arrive in the register to close the sale.

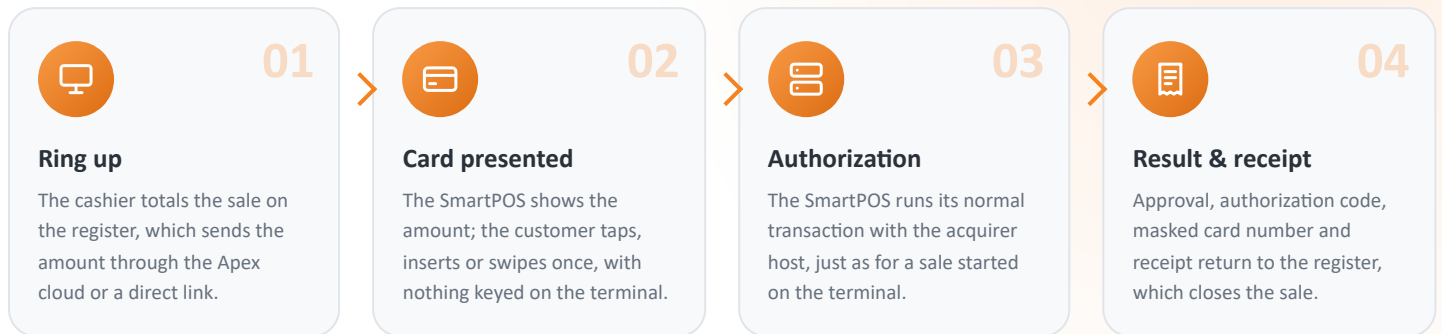

Cash-register vendors

- ✓ A ready-made integration kit gives a direct link to the SmartPOS.
- ✓ Or connect through the Apex cloud, with no cables.
- ✓ Terminal messages can be mirrored on the register screen during the sale.

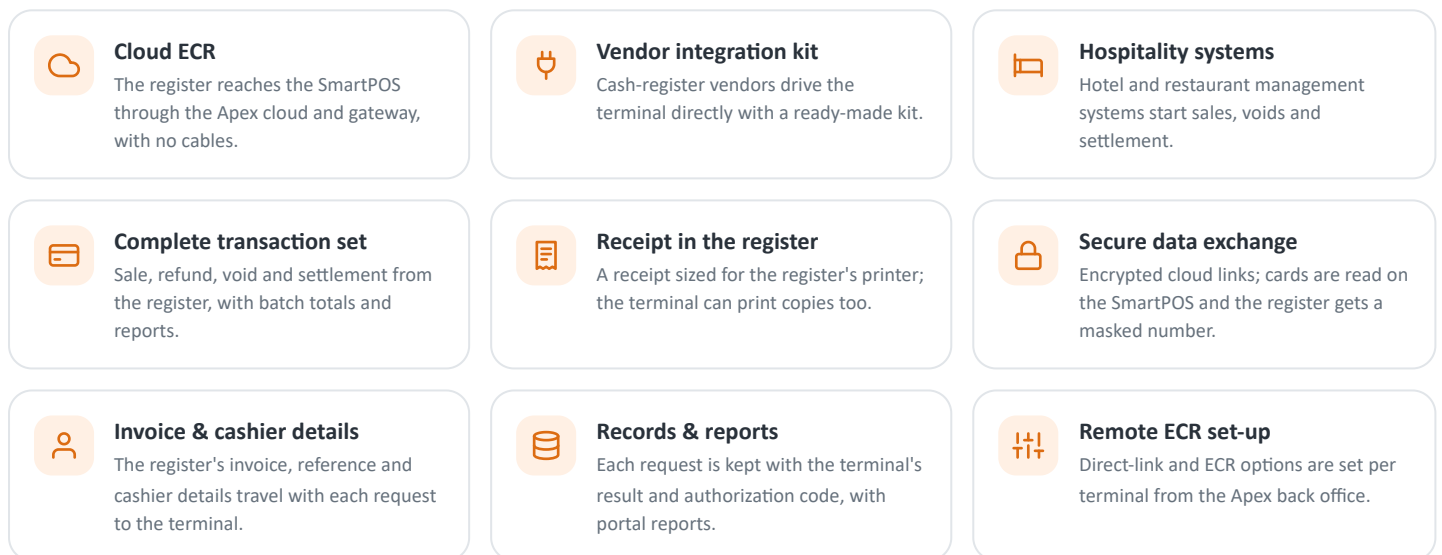

HOW IT WORKS

From the register to the terminal and back

PLATFORM FEATURES

Everything needed to connect the counter

IDEAL FOR

 Retail chains

 Supermarkets

 Hotels & resorts

 Restaurants

 Cash-register vendors

PLATFORM

Part of the Apex SmartPOS platform

ApexECR works with the SmartPOS terminals, gateway and portals you already run, and Apex deploys and supports it for each institution.

Ready on Apex SmartPOS

ECR support is built into the Apex terminal application.

Institution isolation

Each institution has its own ECR service, databases and configuration.

Works with your host

Register sales run as normal terminal transactions with the acquirer host.

Per-terminal control

The bank switches ECR on per terminal, so each counter is connected only when needed.

Let's talk payments.

Contact Apex Payment Solutions for a demo of ApexECR.
