

SOLUTION BROCHURE

ApexInventory

POS asset and stock control

End-to-end control of POS terminals, SIM cards and accessories. Know where every device is, from the warehouse to the field engineer and the merchant, and back into stock when a merchant leaves.

ISO/IEC 27001 CERTIFIED

PCI S3 CERTIFIED

WHY APEX INVENTORY

Know where every device is

Apex Inventory keeps one record for every POS terminal, SIM card and accessory your institution manages. Each terminal is tracked by its serial number, with its model, versions, warranty and SIM card, and its current place: a warehouse, a field engineer, a merchant, maintenance or write-off.

Every move is checked against the movements allowed for each location type and recorded with its date and reason. Maintenance invoices keep the repair cost of each device, and with the optional ApexRPM link, terminals in the field keep their own records up to date.

Lifecycle

One record per device, from new purchase to write-off.

By serial

Each terminal and SIM card is tracked by its serial number.

Auto-sync

Device moves flow in from ApexRPM, not spreadsheets.

KEY BENEFITS

Built for acquirers, warehouses and field teams

Acquirers & banks

- ✓ Know where every device is, from the warehouse to the merchant and back.
- ✓ Less loss and leakage: SIM cards and accessories are accounted for.
- ✓ Repair costs and maintenance visits recorded for every terminal.

Warehouse & operations

- ✓ Receive terminal and SIM card orders one by one or from a file.
- ✓ Stock-count sheets list system counts per warehouse and model.
- ✓ Clean merchant exits: returned devices and accessories go back into stock.

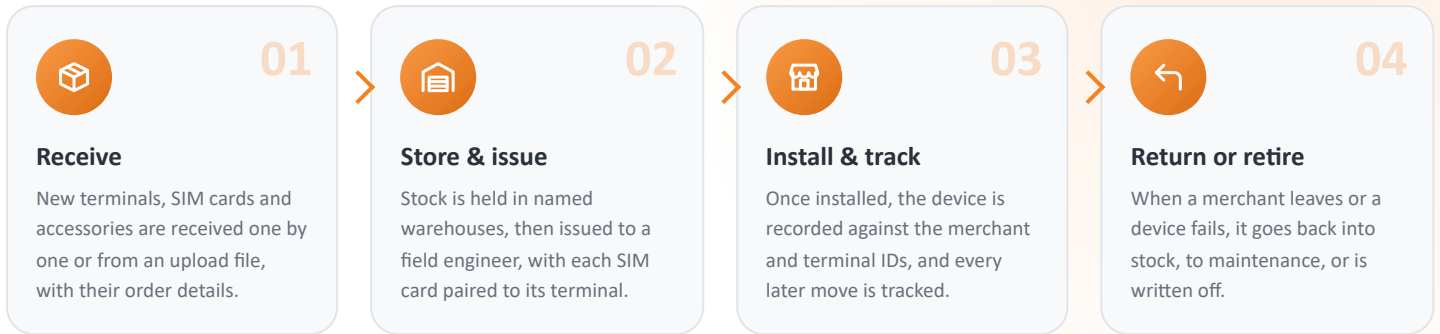

Field teams

- ✓ Terminals and SIM cards issued to each engineer are tracked by name.
- ✓ Reports show how many terminals each engineer holds, by model.
- ✓ With ApexRPM, an engineer's clock-in at the merchant records the swap.

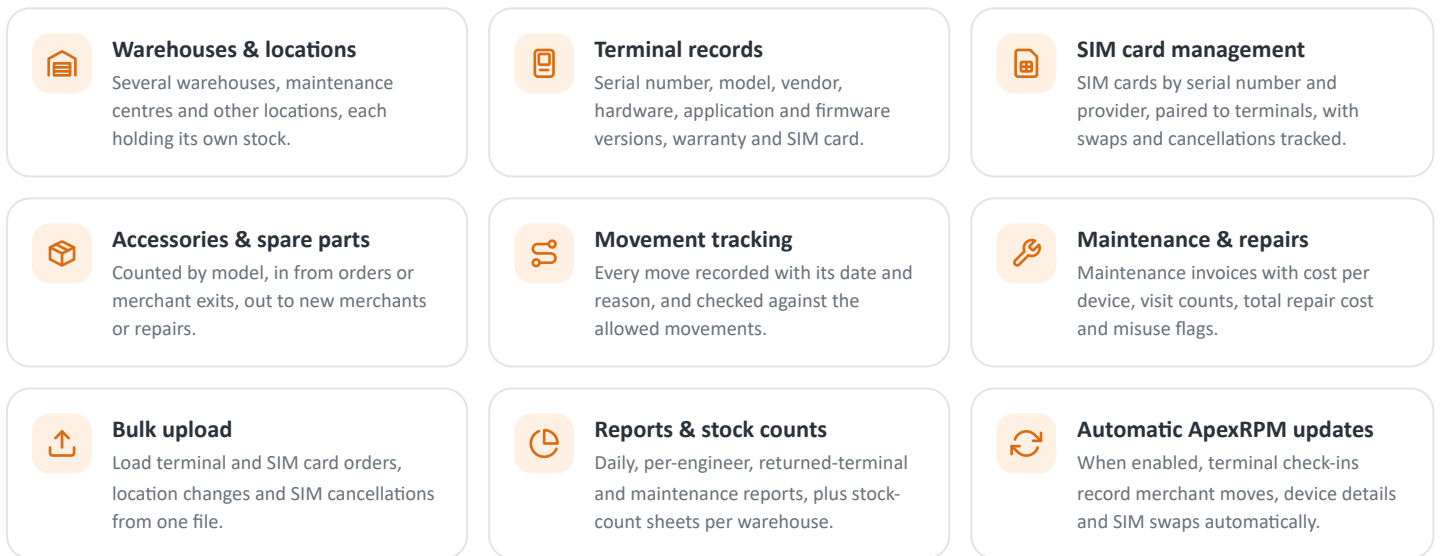

HOW IT WORKS

From the warehouse to the merchant and back

PLATFORM FEATURES

Every device, every move, on record

IDEAL FOR

 Acquirers

 Banks

 Payment service providers

 Logistics teams

 Field service teams

PLATFORM

Part of your Apex portal

Apex Inventory runs in the same Apex admin portal your teams use for merchants, terminals, TMS and RPM, so there is no extra system to learn.

One device catalogue

Vendors and models are shared with ApexRPM, so names always match.

Institution isolation

Each institution has its own inventory database, locations and settings.

Fast start

Apex sets up your locations and imports your existing inventory list.

Linked to merchants

Installed devices carry the same merchant and terminal IDs as the portal.

Let's talk payments.

Contact Apex Payment Solutions for a demo of Apex Inventory.
