

SOLUTION BROCHURE

Apex Payment Gateway

The secure acquiring engine

One gateway connects your terminals, cash registers and wallets to acquirer hosts, card schemes and value-added services, with a dedicated deployment for each institution.

ISO/IEC 27001 CERTIFIED

PCI S3 CERTIFIED

WHY THE APEX GATEWAY

One integration, every channel

Every Apex SmartPOS terminal talks to one secure gateway. The gateway checks each request, routes it to the right plug-in and connects it to the acquirer host, national switch or value-added service behind it, then returns the result to the terminal.

Because each transaction type is a plug-in, new services reach the fleet without changing the host. Each institution runs its own gateway and databases, so its data and configuration stay apart.

1 gateway

One entry point for terminals, cash registers and wallets.

Multi-host

Proven links to acquirer hosts and national switches.

Plug-ins

New services added as plug-ins, not host changes.

KEY BENEFITS

Built for acquirers, merchants and operations

Acquirers & banks

- ✓ Faster time to market: new services ship as plug-ins and terminal settings, not host changes.
- ✓ Connect each host once and reuse it for terminals, cash registers and wallets.
- ✓ Multi-acquirer terminals serve partner acquirers and shared merchants.

Merchants

- ✓ A complete transaction set on one terminal, from sale and refund to pre-authorization and tips.
- ✓ Automatic reversal handling keeps every sale in step with the host.
- ✓ DCC, promotions, wallets and eReceipts on the same device.

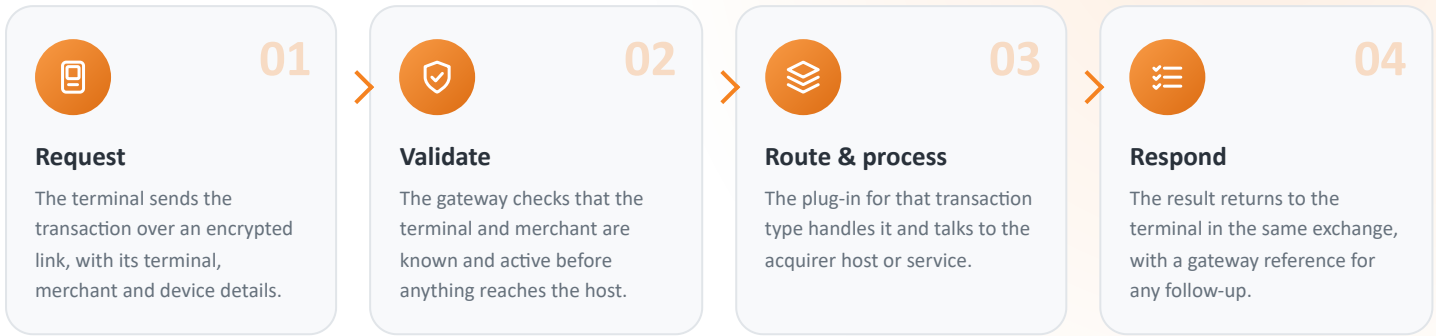

Operations teams

- ✓ A gateway reference on every response to trace any transaction.
- ✓ One gateway for terminals, cash registers, wallets and add-on services.
- ✓ Remote support through ApexTMS and ApexRPM on the same platform.

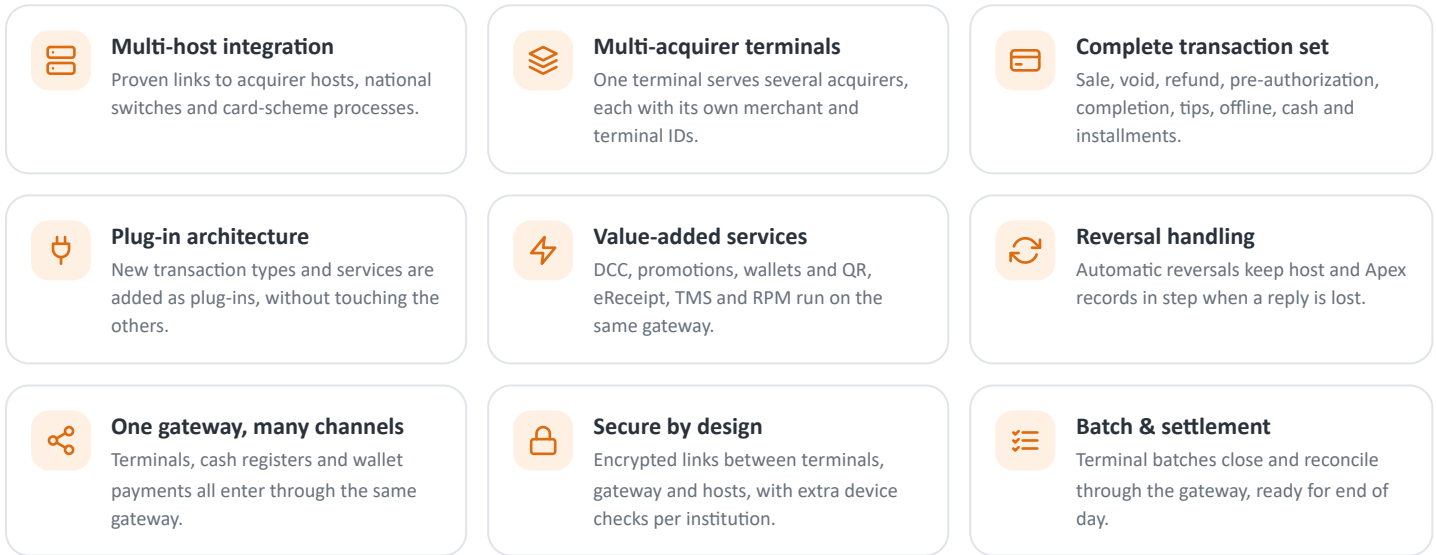

HOW IT WORKS

From the terminal to the host and back

PLATFORM FEATURES

Everything an acquiring gateway needs

IDEAL FOR

 Banks

 Acquirers

 Payment service providers

 Processors & switches

 Wallet providers

Let's talk payments.
