ISO/IEC 27001 CERTIFIED

PCI S3 CERTIFIED

APEXTMS
Up to date

APEXRPM
Heartbeat OK

WHY ANDROID SMARTPOS

Hardware and software together

Apex delivers certified Android devices from a global terminal manufacturer with the Apex POS applications, staged and configured for your institution. Every terminal talks to the Apex Payment Gateway over an encrypted link, so cards, wallets, DCC, promotions and eReceipts run on the same device.

ApexTMS keeps every terminal's applications and parameters up to date, and ApexRPM monitors the fleet and sends remote actions, so support teams can act without a site visit. One terminal can also serve several acquirers, each with its own IDs.

6 models

Portable, compact, dual-screen, unattended and mini.

1 device

Cards, wallets, DCC, promotions and eReceipts on one terminal.

Remote

Updates and support through ApexTMS and ApexRPM.

KEY BENEFITS

More value from every terminal you deploy

Acquirers & banks

- ✓ Payments, wallets, eReceipts and promotions on the same terminal.
- ✓ A model for every segment, from retail counters to self-service.
- ✓ New terminals set up quickly from ready-made TMS templates.

Merchants

- ✓ Large touchscreens, contactless and Android apps speed up checkout.
- ✓ Printed receipts, or eReceipts sent by SMS or e-mail.
- ✓ Help tickets and emergency calls raised straight from the terminal.

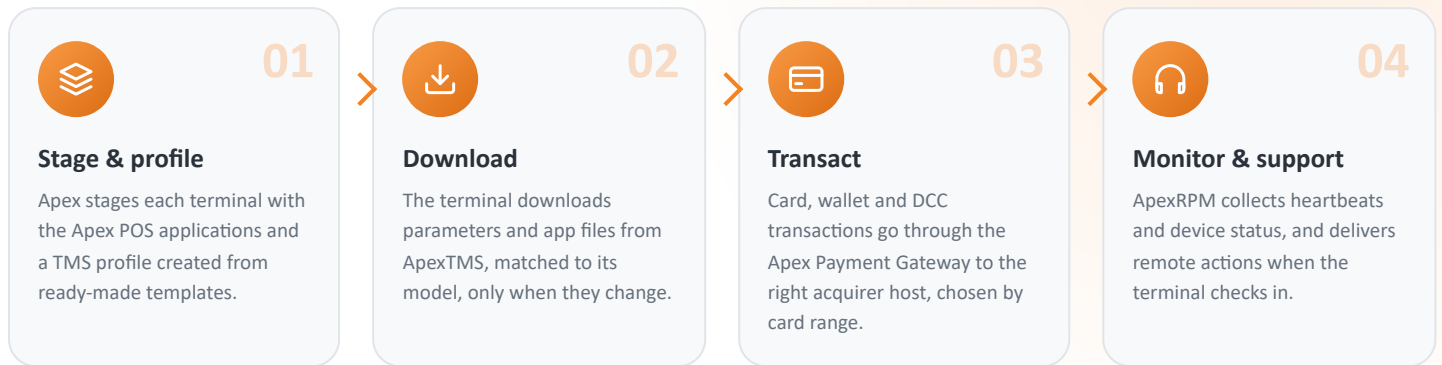

Operations teams

- ✓ Lower field costs: remote management with fewer site visits.
- ✓ Heartbeats, hardware warnings and status for every terminal.
- ✓ Field-agent visits recorded per terminal as agents clock in and out.

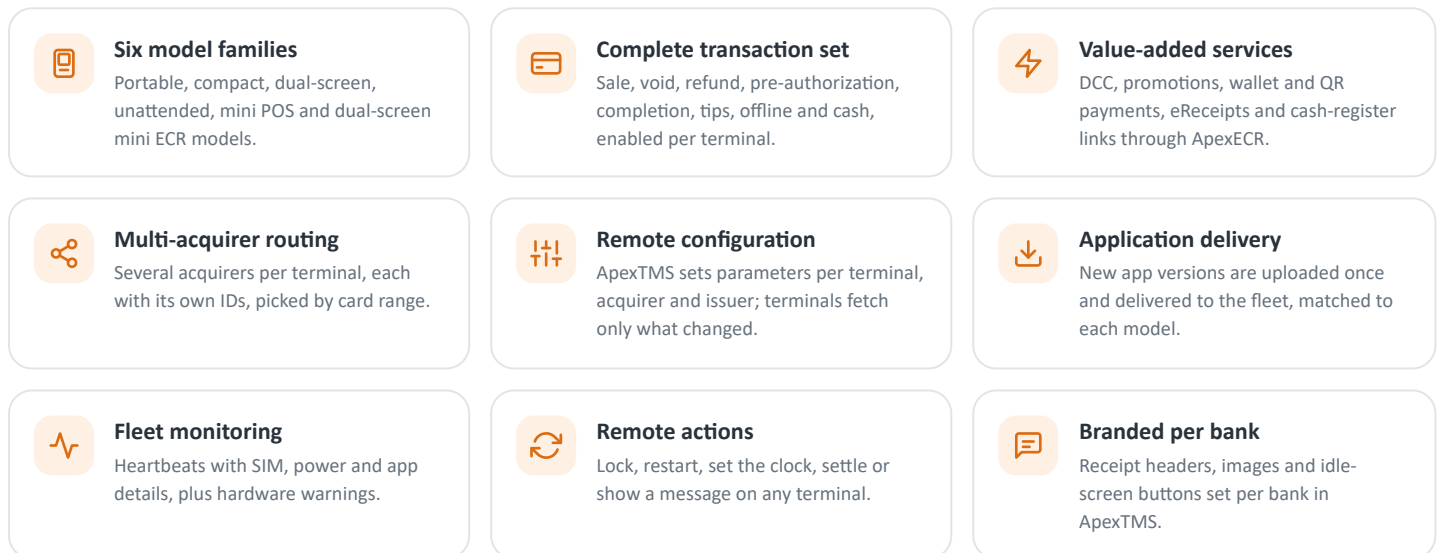

HOW IT WORKS

From staging to the merchant's counter

PLATFORM FEATURES

Everything a modern terminal estate needs

IDEAL FOR

-  Retail stores
-  Restaurants & cafés
-  Hotels & resorts
-  Self-service
-  Field sales

DELIVERY

One accountable partner

Hardware, software, integration and support come from one team, so there is one number to call.

Staged and rolled out

Terminal staging, TMS profiles and remote deployment to the fleet.

Managed releases

Apex builds and deploys application and database releases for each institution.

Remote-first support

ApexRPM and ApexTMS let us diagnose and update terminals without a site visit.

Dedicated deployment

Each institution gets its own gateway, databases and configuration.

Let's talk payments.
