

SOLUTION BROCHURE

Apex Wallet & QR Payments

Scan to pay on the same SmartPOS

Accept instant payments and mobile wallets on the SmartPOS your merchants already use: a dynamic QR code on screen, payment from the customer's own app, and instant confirmation with a printed receipt.

ISO/IEC 27001 CERTIFIED

PCI S3 CERTIFIED

WHY APEX WALLET & QR

A dynamic QR code for every sale

Many customers now pay from their banking and wallet apps. Apex Wallet & QR Payments lets them do it at the counter, on the SmartPOS that already takes cards: the merchant enters the amount, the terminal shows a dynamic QR code, and the customer scans it and approves.

The provider confirms the payment and the terminal prints the receipt. Wallet and card transactions are then settled and reported together, and every new wallet or QR provider plugs into the same integration. For merchants, it is simply one more way to get paid.

1 terminal

Cards, instant payments and wallets on the same SmartPOS.

3 methods

Instant payments
Mobile wallets
Banking apps with QR

Instant

The provider confirms and the terminal prints the receipt.

KEY BENEFITS

Value for everyone at the counter

Acquirers & banks

- ✓ Accept every way to pay: cards, instant payments and wallets on one terminal.
- ✓ Reach wallet-first customers who pay from banking and wallet apps.
- ✓ New wallet and QR schemes plug into the same integration.

Merchants

- ✓ No extra device: the QR appears on the SmartPOS that takes cards.
- ✓ Instant confirmation and a printed receipt for every wallet payment.
- ✓ Wallet and card sales are settled and reported together.

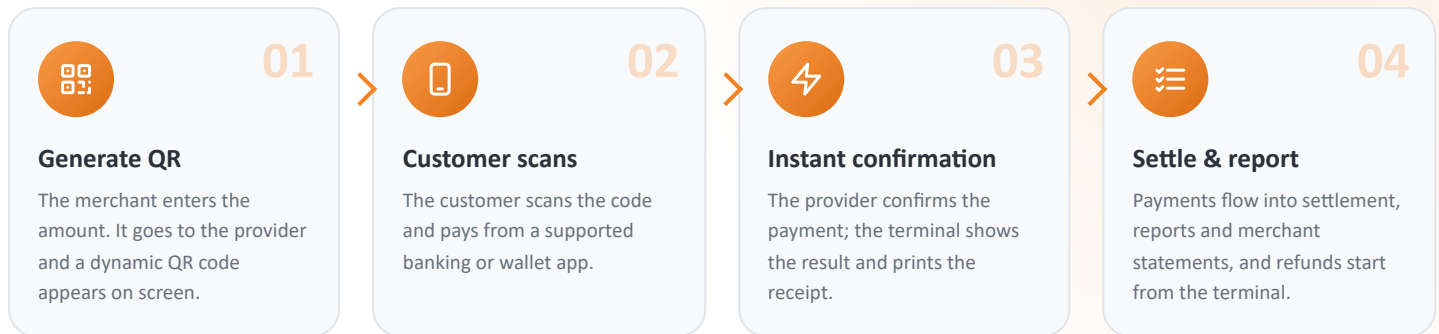

Customers

- ✓ Pay by scanning the QR code with a supported banking or wallet app.
- ✓ The amount comes with the code, so they only check it and approve.
- ✓ No card to hand over and no card details shared at the counter.

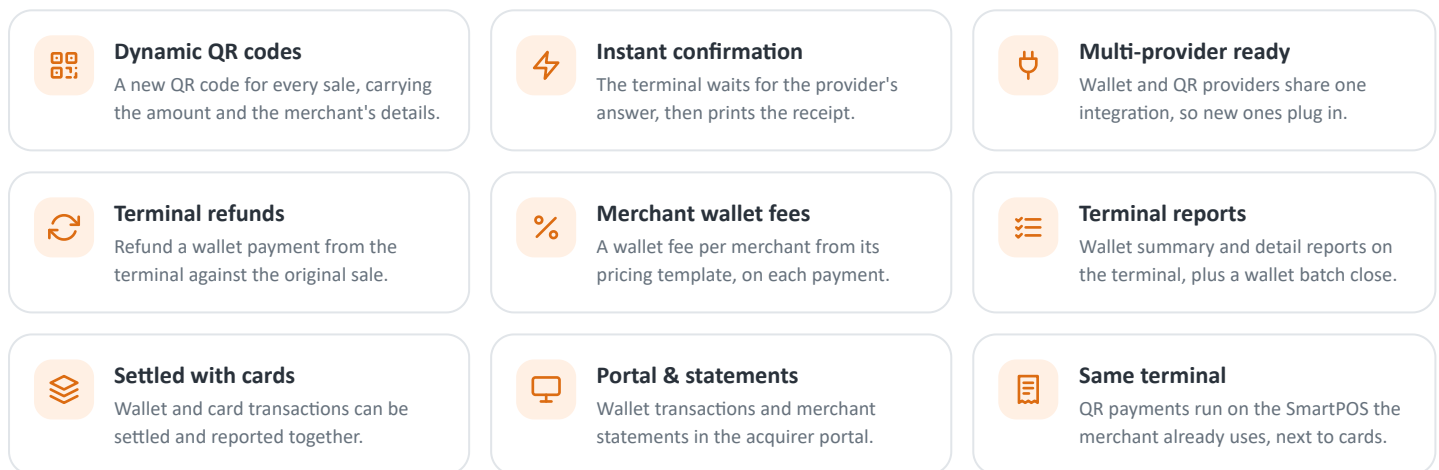

HOW IT WORKS

From QR code to printed receipt

PLATFORM FEATURES

Everything needed to accept QR payments

IDEAL FOR

 Retail & groceries

 Restaurants & cafés

 Pharmacies

 Delivery & field sales

 Small shops

PLATFORM

Built on the Apex Payment Gateway

Wallet & QR Payments runs in the same gateway as your card acceptance, so wallets reach your SmartPOS fleet without a separate system.

Ready on Apex SmartPOS

QR sale and refund are standard transactions of the Apex terminal application.

One provider link

Apex connects each provider once, and every terminal of the institution can use it.

Institution isolation

Each institution has its own gateway, databases and provider settings.

No card data

Customers pay inside their own app; no card is read at the terminal.

Let's talk payments.
